SECURE PARK DEVICE

ABOUT US

At IOTTECH SMART, we're dedicated to shaping the future of smart security solutions for everyday life. Our mission is to provide innovative, reliable, and user-friendly technology that enhances security and convenience. With a wealth of experience, we specialize in designing user-friendly and reliable security technology. Our products and solutions are trusted by customers around the world, offering advanced IOT security.

Mission

Our mission is to unlock new levels of security by providing accessible and smart security solutions that empower individuals and businesses alike. We aim to enhance confidence by making advanced security accessible to all.

Vision

We envision a safer and more connected world where technology enhances security and convenience. We aim to be recognized as a global leader in IoT security technology, setting new standards for innovation and reliability.

SecurePark - Your Universal Smart Lock

SecurePark is the ultimate solution to upgrade the security of your vehicle, whether it's a motorbike, car, or any other type of vehicle. This innovative device seamlessly converts your traditional lock into a cutting-edge smart lock, enhancing protection and convenience.

Key Features:

- **Geofencing:** Set virtual boundaries to monitor and control vehicle movement with precision.
- **GPS Tracking:** Real-time location updates for enhanced logistics and security.
- **Upgrade Your Security:** Convert your traditional lock into a smart lock effortlessly by adding SecurePark.
- **Antitheft Alarm and Notification:** Instant alerts in case of unauthorized access or suspicious activity.
- **Vehicle Analytics:** Overspeeding Alerts, Acceleration Info, Turning Data (Left and Right) for optimized route planning.
- **Fingerprint Unlocking (Model specific):** Biometric access for an additional layer of security.
- **Easy Installation:** User-friendly installation process for seamless integration into existing setups.
- **Convenient Access:** Unlock or start vehicles using a registered PIN, one-time password (OTP), or fingerprint authentication, depending on the model.
- **User-Friendly App:** Control, monitor, and customize your lock's settings through the intuitive SecurePark mobile app.
- **Universal Vehicle Compatibility:** Designed to fit a wide range of vehicles, ensuring versatility.
